

Application S/N 10/626,242
Amendment dated: June 10, 2005
Response to Office Action dated: March 10, 2005

GE11159JI260

Amendments to the Drawings:

In the Office Action, the Examiner objected to the drawings because the figures were improperly cross-hatched. In response, the Applicants have submitted replacement drawing sheets, which are attached to this amendment. The Applicants have amended the drawings by selecting a cross-hatching that complies with MPEP § 608.02. The cross-hatched portions have also been labeled with text to clarify their composition, also in accordance with MPEP § 608.02. It is understood, however, that this labeling is merely an example of such a composition and should not be read into the claims as a limitation.
